wide-type AA seq of V_H and V_L
mutations
...
Sequence design
assemblied with plasmid backbone
plasmid
B cell
(Digest for Fab)
Antibody cloning and purification
corresponding Antigen
Heat up to melting
Soluble membrane protein
HLA binding prediction
Pseudo-virus
Binding affinity (by Fab K_D, MoI)
Thermostability (by T_m, °C)
Non-specific binding (by MFI)
Immunogenicity (by pred T-cell)
Viral neutralization (by IC_{50})
Biological evaluation metrics
